Headline: Turn Wordpress Into The Ultimate Affiliate Marketing M.A.C.H.I.N.E! Turn Wordpress Into The Ultimate Affiliate Marketing M.A.C.H.I.N.E This is one of the simplest to use redirection plugins for Wordpress that has been released to date. No hacking themes or jacking with the .htaccess file, just install, make a post or page and enter the URL where you want visitors forwarded. This is like having your own URL redirection service, but you are able to use your own domain name. Great for masking and shortening affiliate links! If you have permalinks setup on your Wordpress install, your links would look like: yourdomain.com/somepost/ or yourdomain.com/category/somepage/ You do not have to actually put any content into the post of page, you just add the name and enter the destination URL. This is all that is required, take a look at this short video. It just does not get any easier that that! I have seen and used many of these type of plugins, just did not like the way they worked. Way too many features or just plain ole hard to use. So I had my own made!
