

Hot Link Nuke Script

[DOWNLOAD HERE](#)

hot linking of images. Image sentinel not only prevents other sites from linking directly to your images but also hides the location of your images, making it impossible for anyone to access your hard won content without going through YOUR web site. A visitor following someone else's link to one of your images can optionally be sent back where they came from or redirected to a page of your choosing e.g. your sign up page or links page or Yahoo for that matter.
