Getting your content listed in the search engines is the key to profiting from your efforts. If your articles, press releases, or blog entries fail to get a good rank in the search engines, they often end up being worthless to you. This is why it's essential that you make sure your articles are optimized for the search engines. One of the most important ways to do this is to make sure you have the right keyword density for the search terrms you want to get ranked for. If you include your keyword too much, then you're going to likely get penalized. If you don't put it in not enough, then you'll miss the mark of what the search engines want. Simply put,... To Reap Large Amounts Of Search Engine Traffic You Must Get Your Keyword Density Exactly Right! Of course, you can go through all of your articles and compute your keyword density manually. But, this takes forever with more than one or two articles. Or you can make sure you have the perfect density every time and within seconds using a new tool called, "Article Analyzer." Article analyzer is a piece of software that automatically computers the exact keyword density with a few clicks of your mouse. As a result, you can rest assured your articles are optimized to claim profitable search engine rankings! important to your success comes down to this question... How Much Time, Effort, and Money Are You Throwing Away With Content That Fails To Get Ranked In The Search Engines? Simply run your content through Article Analyzer to ensure the search engines are going to like it. As a result, you're likely going to make far more money from your content.
