Twitter Script is a revolutionary PHP software that allows you to run your own micro blogging site just like Twitter. What is Twitter? Twitter is a free social networking and micro-blogging service that enables its users to send and read messages known as tweets. Tweets are text-based posts of up to 140 characters displayed on the author's profile page and delivered to the author's subscribers who are known as followers. Senders can restrict delivery to those in their circle of friends or, by default, allow open access. Users can send and receive tweets via the Twitter website, Short Message Service (SMS) or external applications. Micro-Blogging Phenomenon Micro Blogging is a growing area in the social networking and mobile blogging industry. Twitter is the fastest growing social networking website at the moment. Jaiku, which is similar to Twitter has been recently purchased by Google for an impressive amount. What is Twitter Script? Twitter Script is a powerful PHP micro-blogging social networking script that allows you to start your own site just like Twitter affordable price!
