All of us that are into selling any type of product on the internet spend alot of our time trying to figure out the best ways to automate our websites into well oiled machines that do most of the work making money for us. But the fact of the matter is no matter how automated your site is, there is always going to be a large amount of E-mail to respond to! Your site may take orders and deliver your product automatically but there will always be a certain amount of E-Mail that you will need to answer every day. The Good News is that about 95 of the questions that are asked are always the same ! You know what I mean..... When can I expect to receive the order I placed on your website today ? I lost the link to download the software product I bought from your website, can you re-send me the link? I am interested in joining your affiliate program can you send me information on how I can join today ? etc..... etc.... etc.... If you think about it, you are probably like most Internet Marketers in the fact that you on average receive the same 20 or so questions on each product that you sell.
