. . . whats wrong with Johnny? His normally bubbly, bouncy personality has taken a drastic turn over the last few days and weeks. Hes been quiet, withdrawn and even when he does speak his attitude is almost surly! "The Parents Guide to Home Schooling" What parent cant identify with a scene like this one at least on occasion? No matter what generation you relate to, none of us can relate to what kids go through in public schools these days. Can you relate? Yes, we can recall some instances of childhood cruelty like mocking and bullying. But, unless you are somehow connected to the school system you have no idea what kids today go through. Even if you do work in the school system at any level, the stealth tactics are sometimes so subtle you just dont identify with them. Children today are routinely subjected to bullying, extortion and often physical abuse. And thats from just one faction of the social hierarchy that goes on in public schools today! How it begins It begins with a bit of shoving in the hallway and can progress as far as kids having to pay for protection or even worse. School administrators do try, but its a sad testimonial that we must now have armed guards patrolling our public schools. Teasing, taunting and public humiliation have gone far beyond what we went through as children. We havent even begun to discuss the education that our school age children are supposed to be getting in public school. Maybe you are one of those people who can afford private school. Thats wonderful, but sadly that is not an option for most people. And, even private schools can have their own brand of social and educational drawbacks. Is there a solution? The answer is yes, there is an answer. The solution is home schooling. However, when you think of home schooling you may be under the mistaken impression that you do not have the skills required to teach your children, which is another myth. In order to insure that your child is prepared with the best education possible to prepare them for college or university, you need to arm yourself with information on home schooling. Only then will you be prepared to make an intelligent decision regarding such an important step. Thats where "The Parents Guide to Home Schooling" comes in. A decision to home school your children should not be taken lightly. It will mean drastic changes to your family dynamics. If both parents work, one will have to commit to leaving the workforce. While that may

undoubtedly affect the standard of living that a family enjoys, most parents who have reached that decision report that they don't regret the decision at all. Many other questions arise when contemplating this step. "The Parents Guide to Home Schooling" examines them thoroughly. Here is just a sample of what you can learn about home schooling: Why should you home school your child? Do you need special permission from your state? How to determine the length of your school year? What supplies do I need? Are there textbooks available? How do I grade my child's progress? What costs are involved? How do I prepare a lesson plan? It doesn't matter if you just want to explore home schooling possibilities or have made the decision and are looking for a guide to point you in the right direction, "The Parents Guide to Home Schooling" will provide you with the information you require. There is plenty of information inside to answer your questions and help you decide how to get started. Many families who pursue home schooling report it as the most significant thing they have done in their entire lives and highly recommend it. Instead of watching the evening news and shaking your head over the declining public school system, take control. Home schooling your children may be the most rewarding experience of your life. Find out how by reading "The Parents Guide to Home Schooling!"
