

Alertpay Randomizer Script

[DOWNLOAD HERE](#)

This Alertpay Randomizer Script uses a database to store members and administration information. This script can be used as a stand alone website or as an addition to any website. Visitors are directed to the website through members referral links or if their is no referral, it will randomly choose one. Visitors can then sign up by first paying their referral and then paying the admin fee through Alertpay. They will then automatically become a member. Once signed up, new members will have access to any downloads the admin (you) have added, access to automatic upgrades at prices the admin (you) set, their own personal referral link to send visitors to, and more. Simple administration area allows the admin (you) to set membership and upgrade prices, send newsletters, remove members, add news and/or advertising to both front page and members area, add downloads for members, and more. Installation of this script is simple with the included detailed installation instructions. You can have this script installed and ready for visitors within 5 minutes. IMPORTANT: This script will only work on... PHP version: 4.4.7 (Or Lower) MySQL version: 4.1.22-standard-log (Or Lower) Features: * Set Your Own Membership And Upgrade Prices * Pays Referrals First Every Time * Automatic Memberships And Upgrades * Free-For-All Link Page
