If you have tried blogging...you will agree that posting your own articles on your blogs every single day may take the ****lights**** out of you... This happened to me too, because I had too many projects too handle and I always wished how easy it would be too have a system run for me posting on my blogs (not a single blog) every single day, making my site look fresh

with resources and virtually feeding the Search Engine Spiders. The biggest blow or revelation should I call it, came to me when one of my clients came to me and asked me why I have not update my site for months...and there I was with jars ajarred staring backat him thinking of a fast get away....in the first place I wasnt even sure that anyone will notice about the inconsistency of my blog posts...but they do! So I went a step further..looking for answers on how to automate my blogs and I have even tried software programs of up to hundreds of dollars to do this, in fact I have a Script thats costing me thousands of dollars and months of development that is ongoing right at this moment of writing..but the whole point is that I have found free resources to do just that....AUTOMATE MY BLOGS.
