Product Details-- Question: What Is Podcast / Podcasting ? Answer: A podcast is basically an audio file that is stored on the Internet (An rss file that contains audio content) that people can download to their computers , IPODS and MP3 players and listen to whenever they want.Think of a podcast as a communication tool for your business - A way to deliver any audio content to a large audience worldwide. It's like creating your own radio programs online. Podcasts can be about any topic you can think about. The topic might range from music to talk shows to business letters to lectures, tele seminars etc.With this incredible Podcast software from PodcastDirector, you can not only create podcasts of your choice but you can also convert any textual information to a sound file for your podcast. A recent analysis showed : *More than 22 million adults from United states of America own an IPod or MP3 player. *20 of the lucrative market (Age 18 to 28 years) own a MP3 palyer or IPOD. *29 percent of the people who own an IPod gadget or a MP3 player device have downloaded a podcast. Which means a whopping 6 million U.S adults have downloaded podcasts (Impressive figure keeping in mind that podcasting is still a relatively new technology). Possible uses for podcasting include: Interview authors , leaders, internet gurus in your industry, then offering the interview using a podcast through your website or blog. Offer Industry news , critical updates and upgrades info , new releases etc. Target niche customers : You can provide ezines, articles or information even when the user is away from his/her computer. People who speak at conferences and seminars can offer podcasts of their sessions for those people who were interested but where unable to attend the events. Companies can provide critical news and update to their employees and volunteers. Features / Advantages Of Phoenix Podcast Studio Podcast recording - Create wav file for podcast in seconds.
