Network Marketing Explosion + Gift Discover How YOU - Or Anyone - Can Explode Your Network Marketing Business To GREATER Heights As Practiced By TOP Networkers From Around The World! If You Have Not Been Achieving The Kind Of Success You Desired In Your Network Marketing Journey Up Until Now, Then This Is Going To Be The Most Important Letter You Will Ever Read! Why do so many network marketers today fail at playing in their own turf? There's a good reason for that: the vast majority of people who attempt network marketing are so blindly driven towards earning money that they forget to consider the human element. Incidentally, it is the only thing that really matters in building a successful network marketing business. In fact, most people who are in network marketing today haven't even tried the products they attempt to sell or attempt to get other people to sell. This is nowhere more apparent than on forums, where a new network marketer will often post a signature that urges readers to join his network. Yet, at the same time, he'll make a post asking if the network he is already promoting is any good. This instantly reduces his credibility to zero. Sounds completely bizarre? But it happens on a fairly regular basis. In Network Marketing, It's VERY Dangerous To Be Just Average. So what makes network marketers just average? While part of it often has to do with effort and consistency, the most important thing that average network marketers miss is... L-E-V-E-R-A-G-E They concentrate on small targets and small goals and never put the entire network into perspective. Here are some examples of goals that could keep a network marketer average, when they could be wildly successful: \* Disorganization. As a network marketer, you will likely have to manage dozens of contacts, hundreds of customers (if it is your product), and all sorts of payment and scheduling information. If you want to be successful, you must have a clear, workable system for every activity you engage in. \* Marginal Focus. While the small gains are important too - in fact, they will make up the bulk of your activities as a network marketer - it is more important to focus on big gains, which take more work, but when achieved, will completely gain how your network functions. An average network marketer often won't see beyond what is marginal. \* Unrealistic Goals. This almost always kills anyone who attempts to create a network or start an Internet business: they set unrealistic goals and attempt to achieve them in an unrealistic period of time. The end result is a

complete disaster. Why Give In To Being Average When You Can Join The Ranks Of TOP Networkers?

The major difference between most successful and unsuccessful network marketers is that successful network marketers have gained significant leverage over a long period of time. Its often easier said than done, however. And thats exactly why you should be reading every line of this letter. Announcing:
