-= PC/OS Linux 2009va2 OpenWorkstation Virtual Disk Image =- This is the Virtual Disk Image of (Version 2 a) PC/OS Linux Complete with VBoxGuestAdditions installed and working well. Version Release Notes: PC/OS 2009v2a has been released for the general public. This release fixes many of the application stability issues that users had with PC/OS 2009v2. With this release we went ahead and installed all updates, so all security updates since PC/OS 2009v2 have been applied. The changes to PC/OS 2009v2a applications are common across all releases: Asunder 1.6.2, Audacity 1.3.7, Brasero 0.8.4, GIMP 2.6.5, Gufw 0.20.7, Pidgin 2.5.5, Murrine Engine 0.60.1 SVN143, WINE 1.1.16, Opera 9.64. The OpenWorkstation no longer has the Qt designer application or Qt developer tools, it now includes the Qt SDK with Qt Creator 1.0.
