Transparencies: Transparencies are provided where there is more than one ecover to a NicheSite to enable you to create your own 'medley'. You get them with and without text and two sizes in each Altering the Graphics to Suit: Although the graphics have been flattened in accordance with the License of the stock photographs, I have left the text as layers in the PSD files. If you have Photoshop, you can very easily change the PSD files to suit your website or title of your product by changing the text. If you do not have photoshop, you can still change the text to suit as I have provided both sample and blank JPG files which can be opened in any graphics program.
