Discover with PRECISION what your prospects type into the search engines to find you .. proprietary software UNCOVERS the Exact Keywords that will pay off in Big Profits! Until now, such data was accessible to few big time marketers only. Read on to learn about the selfish reason why already successful marketers are doing their best to stop me from selling this system. KeyWord Link Tracker As you read on, Ill tell you more about how this software will help you but let me tell you some straight from the facts about the rest of the picture. FACT IS that this software will help you to find the exact keywords that BUYER enters to find your business. Its like the BUYERS telling you which keyword they entered to find you. And, why this is important? Because, knowing the RIGHT keywords make you money ..PERIOD! Date: Saturday, January 16, 2010 From: Valeriy L. Dear Affiliate Marketer, Its time someone cut through all the clutter and explained the difference between keywords that bring you traffic and keywords that make you real sales. What is the Number One Secret behind Becoming Rich Online? Knowing Your Profitable Keywords Believe it or not. Knowing your profitable keywords, with laser targeted accuracy, is the only secret of internet riches. It doesnt matter how good your product is or how wonderful you set up customer support. What matters most is your list of profitable keywords. Why? Simple.. You have no products in the hands of customers and you have no customers to support unless you make sales. And how do you make new sales and build new customers? By sending targeted traffic to your business. And how do you send that targeted traffic to your business? By knowing your keywords! Two Humiliating Secrets That The Experts Jealously Guard And Dont Want You To Know It all began with a little question I asked myself, How Do Some People (who dont even know a thing about SEO and their sites dont even rank in the first five hundred pages of google) Make So Much Money On The Internet While Most Others Dont? The answer was not obvious! In the beginning, I used to think that they work really hard to research their markets, compile lists of endless keywords and then test the effectiveness of every keyword to keep the gold and trash the junk. - I was dead wrong - What they a-c-t-u-a-l-l-y do to earn thousands of dollars every day is hidden (and is intentionally kept as a secret) from you. Think about it.. We have all struggled, tweaked our keyword campaigns only to come up with

break even profits. We might see few sales, but balancing our ad-spend with our profits has always been challenging. The two real secrets...have always been: Secret Number 1: Discovering the keywords a buyer enters in the search engines when theyre ready to buy? Secret Number 2: Discovering which keywords finally converte into a sale? There had to be a way to find out the keywords that people type in the search engines, I wondered, Can I afford the guesswork and keep struggling and using the same tools, which give me nothing but just a list of keywords for hit and trial? I want to level the field so that I could play on the same play field with the big boys. Surely there has to be a way...there has to be a solution. SHOW ME THE BUYERS I thought to myself, I dont want to use tools that provide such poor results anymore. I need something, I dont know what, but something that will generate keywords that guide real BUYERS to my business. Im more than willing to let my competition have all the other visitors. Just show me the buyers! I knew that if I could find the keywords that people type in to find out my business and if I could also find out a way to track which keywords finally generated sales, that tens of thousands of peoples lives would be made easier, and of course profitable. If such as system is there, I can dispose of the losing keywords and keep the good ones with me. But.. Two Big Problems... First, in order to know which keywords were searched for you have to create one ad per keyword and then append a special bit of text (called a querystring parameter - the ? mark you see in a web url) in every ad that you want to track. Like this - yourdomain.com?keyword=KeyLinkTracker Too much work. Believe me, its just impractical, even for just one campaign . What if youre running dozens of campaigns on many different products? A second bigger problem is that in order to track which keywords have generated sales, you have to place Googles, Yahoos, MSNs (or any other search engine where you run your ad) conversion code on the merchants thank you page. Its just impossible to beg and plead the merchants to add this tracking code to their thank you pages. And this doesnt even include the keywords that were searched and converted by organic search traffic. So... what could be done? After reviewing and working with everything I know - my knowledge, my programming skills - I finally created a killer solution that can track the exact keywords which online surfers type in to find your business, with laser targeted accuracy. My system (and you could be a proud owner of it in a moment) doesnt stop there. It will follow the internet surfer till they buy and then show you which keywords finally resulted into sales. In other words, you get to find out which keywords generate BUYERS. After that, you trash the losing keywords, and keep what works like a well oiled profit machine. So, my friend, let me ask you something: Would you rather go on

the way youve been going or would you like to see something that solves all the above problems with elegance, simplicity and most of all, profitability? If you can just taste the sweet drops of money dripping off the money-tree, then take a look as I proudly introduce to you: Now, Im about to tell you everything this friendly blood hound can do, but first let me remind you of the context: 1 - What a good marketer is REALLY after isnt just visitors. Its visitors ready to buy and to buy now! 2 - The trick is to match the buyer to the product. And in the PPC world, this is done through the correct application and use of keywords. Wrong keywords, wrong visitors. Right keywords, right visitors and money in the bank. 3 - Finally - from a marketers point of view, it shouldnt matter a bit WHAT youre selling. If its your own product or an affiliate product, youre the one shelling out the advertising dollars. Youre the one who should know what keywords bought you the sale! So thats just what KeyWord Link Tracker does! KLT is the ONLY keyword software available at a reasonable price for most marketers that can literally SHOW YOU the exact keywords that BUYERS enter, not just to find your business, but that also result in sales. Its like the BUYERS telling you which keyword they entered to find you. In fact it actually IS the buyers telling you which keywords they used. By using KLT, you spend your money on keywords that work and let your competition spend down their campaign money on keywords that dont work. They walk away with confusion and a headache. You walk away with money bulging from your your wallet. It couldnt be any easier. Here are few of the promising features of KeyWord Link Tracker.. * Find out which keywords finally lead to the sale and dont rely on keywords that bring just maximum clicks. Weed out those tire kickers and leave em for your competition. * Covers both methods - Direct Linking and Landing Pages. * Allows dynamic insertion of keyword and tracking id on your landing pages... Automation? Its covered! * Works with almost every major search engine out there. Never lose a cent again. * Works with almost every major affiliate network (like Clickbank, CJ, Linkshare) and third party affiliate scripts that support adding a tracking id.. * Never plead with a merchant again to add your tracking code on their thank you page. Perhaps for the first time, youll deal from a position of strength. * Access professional reporting with a nice user interface. Get to know what is working at a glance. * Export keyword reports into other systems.. download the real gems (keywords) that work for you, in a spreadsheet format and upload them in your primary keyword list management system (like wordtracker) * Unlimited Tracking - Track all your keywords, conversion and statistical data. There is no limit on the size of your database. Id be pissed if I had to pay for over usage of the system. And Everything Runs From Your Server. You Are In

Total-Control Of Your Data. Now, this is really important. The software runs on your server. You will have a total control over your data.
