Have you been paying out the nose for auto responders and mailing list management services every month? Are you tired of the limits that the monthly mailing services put on you, your subscriber count and the amount of times you can mail? Whatever your situation may be, eliminating monthly fees and taking back control of your mailing list is one of the most liberating feelings youll ever have. I assure you that you are going to be delighted with what you are about to read in this letter and I promise it will change how you do business forever... From: Sumit Menon Tuesday 11:06 AM Dear Friend, Do you pay a ton of money every year to some company that provides you with mailing list management and auto responders? Are you always thinking I wish I could keep that money in my pocket every month? Do you further imagine what it would be like to have a mailing list without restrictions on subscribers, extra monthly fees and mailing limits? Paying out the nose for nothing more than limited mailing, subscribers and additional fees doesnt sound like a good deal to me as Im sure it doesnt to you. Would you like to take control of your auto responders and mailing list management while giving yourself more freedom and room to profit? If you answered yes youll be happy to know that... You Have An Immediate Edge Because Monthly Mailing List Management Companies & Monthly Fees Are Old School! While there are a few mailing list companies that have a decent reputation, they have failed to adjust with the times. You see, the cost of technology has dramatically decreased over the last 10 years. The cost of servers, software and programming have all dropped in price. Dont you think that should reflect a discount in your monthly fee? I sure do but the harsh truth is that no mailing list companies are giving their customers and long time supporters a discount in the cost of service. When they start saving money on a certain aspect of running your list, they definitely dont pass the savings on to you; they pocket it! Im sure that youll agree that you not only deserve a discount in your monthly fees but you deserved one a long time ago. Whats an even further problem is... Youre Stuck With Subscriber Limits, Mailing Limits &

Outrageous Financial Penalties! To top off the fact that you are highly limited with what you can do with a monthly mailing list management solution you are faced with even more huge pitfalls. The first being the limits you have on subscribers. Most monthly mailing list services allow you 5,000-10,000 subscribers for your fee. Anything after that comes at a cost and it isnt a cheap one! You are also limited as to how many times you can mail your subscribers so your communication is extremely limited as is your ability to profit repeatedly. If you wanted to mail a daily tip via a broadcast to your entire list and also send special offers to parts of that list that have shown interest, you might be in trouble with many monthly mailing list services. The worst part of this is you are subject to outrageous fees if you go over your limit. These fees arent to just cover the cost of your extra resources but to financially penalize you. Some services will charge you $50 or more in addition to your monthly fee for going a few subscribers over your limit! Listen to what Shawn Baril had to say about these types of fees... Can I Really Eliminate Expensive Monthly Fees, Subscriber Limits That Hold Me Down & Financial Penalties Without Having To Learn A Bunch Of Complicated Technology?
