"REVEALED - The Secrets To Automated Income! The Sales Funnel Techniques The Gurus DO NOT Want You To Know" Dear New Online Marketer, Information overload is something that hasn't just crept into internet marketing it's thundered in at a gallop! But the simple fact remains there are some techniques you absolutely NEED to know if you're going to succeed online! You need: A list, to build up that targeted traffic An autoresponder, to manage and help you build that list An internet service provider (so you can do business on the web!) A target market (you're still trying to narrow down your ideal buyer!) A payment processor, to collect cash in exchange for your services or products A Domain name (or two) (or more) for your product or services sites A blog, just a place where your market can get to know you A website, to host your landing pages or sales offers And this is where it gets confusing... You begin to research how to do these tasks - and discover there's more than one way to use a website. There's more than one way to use a blog but which one is better for you? Let's cut to the chase - you need to know how the above things work, and you need to put them together... But All Of The Above Are TOTALLY USELESS Unless Your Sales Funnel Is Put Together Correctly! Yep. I'm talking about setting up and using a Sales Funnel. You may even have seen those funny little diagrams Sales funnel is a term that is only really understood when you've got one up and running! Because until you've seen the POWER of a sales funnel and the automated opt-ins and sales it can bring you, you have no way to appreciate its power. If you've sold him a \$27 ebook then why not ask him if he wants to buy a \$97 mini-course or a \$125 DVD? Sales funnels are about obtaining the most value from the leads and customers you've already gathered. It's about guiding them through your products - ideally in a way that progressively adds more value to your bottom line - and services.
