We are surrounded, inside and out, by bacteria, viruses, fungi and other microbes. Meanwhile, the spread of infectious microorganisms has threatened millions during recent pandemics. Is there any hope in winning the war against infectious disease with this growing legion of microbial threats? In "Probiotics - Protection Against Infection" we find clear evidence for probiotics' ability to directly engage and defeat infectious microorganisms. We find new clinical proof of probiotics' ability to specifically boost the immune system while under attack. The author reviewed over 900 human clinical studies and utilized over 500 studies and scientific reports for this complete survey of the medicinal effects of probiotics.
