

Seo Spider Tool - Way To Analyze Websites

[DOWNLOAD HERE](#)

Research competing websites in the search engine rankings by spidering them to uncover link popularity, Alexa rating, and page rank of all the pages. Just enter a URL, choose a couple of settings, and click start. The program does the rest. Here are just a few benefits this tool provides: Quickly and easily query Google to find out how many pages are indexed and what the rank is for each of those listed pages. Powerful phrase matching search option gives you the most targeted rank results for every page indexed by Google. You can check individual pages or use the convenient "Check All" features to analyze the entire list. Discover how well your website performs over time and know at a glance if you're improving your results. Easily analyze any and all competitors' websites and discover all of their TOP performing pages. "Smart" technology ensures that disallowed pages such as robots.txt files won't get indexed or listed. Searches whois records uncovering contact and domain registration information for any webmaster. Compare any two websites to find out which has more indexed pages, better link popularity and a lower Alexa rank. Delivers a concise Summary Report with page rank statistics that you can view, save, or even email. Gives you save options: save all the results, save only the selected results, printing, and/or exporting to CSV

How To Gain Maximum Profit: This software offers a valuable and very unique way to analyze websites. You can easily add more features, combine it into a new search engine optimization tool, or integrate it into a niche product where you need to research competing websites.
