

# Smartdd

[DOWNLOAD HERE](#)

SmartDD is a software package that provides for secure delivery of digital downloads such as ebooks, software, etc. If you sell digital products, you need SmartDD. You may have been the victim of theft, without even realizing it! Many people who sell digital products via Paypal also face the challenge of some customers not getting to the download page, or having to recreate the button via Paypal if they want to make a price change. If you sell a product on multiple websites, this can be very time consuming. SmartDD makes it simple with centralized administration of your products and secure delivery.
