Number generation for various lottery games with the option to input numeric value to base the generation on for 3, 4, and 6 numbered lottery games including Powerball number generation at an exceptional price! Use of this program does not guarantee chance of winning. not compatible with Windows Vista. For years people have been using number generation programs to assist them in winning the lottery. There are a plethora of programs geared toward doing just that but lets face it. The fine print on all these programs all read to the tune of results may vary and no winning plays are guaranteed. Instead the developers try to beguile you with features that to be honest are not necessary. They are honestly doing the same thing I am; Trying to make a buck off of your desire to strike it rich. What I do different is this; I give you the exact same random number generation program for a much more reasonable price tag.
