

# Live Support

[DOWNLOAD HERE](#)

Live Support Live support software can take your website to the next level of sales generation and customer service by adding live chat to your website. It lets you both monitor and record website activity and the surfing habits of your customers. Our live chat software is browser-enabled; it integrates seamlessly with your existing website within minutes. You can proactively extend chat invitations to your site visitors. Quickly direct them to the information they seek or announce a sales promotion.

Live2Supports fully customizable visitor interface provides your site visitors and customers with an enriched user experience. Our live help solution delivers top-rated customer support to your customers thanks to a full range of feature-rich attributes. These include serving up URLs, proactive chat, push page technology, predefined responses and the recording of chat sessions. Your chat operators can now transfer chat sessions to other operators in real time with no interruption. Our live chat solution will skyrocket your sales to new heights and help you provide top-rated customer service. Live2Support enables you to monitor site visitors by providing critical data such as their geographical location, IP address, referrer data and the time of their visit. Monitor chat requests on your website 24X7 from anywhere in the world.
