What I have is a new mini-site template that is different from what you normally see. It's designed to give you that professionalism look combined with a powerful corporate presence. Like it or not, people are tired of the typical header-footer mini-site design. I am tired of it. They don't trust it anymore. The minute they see you typical header, they'll be reaching for the little "x" button on the top right of their browser. They trust Facebook, Twitter, LinkedIn, Google... And take a look at other websites that actually do sell something... 37Signals.com, FreshBooks.com, Mint.com, GoodBarry.com, BlinkWeb.com... Even huge online marketing gurus are changing the way they sell products online. Just take a look at Affilorama.com, ShoeMoney.com, SuccessChef.com, StomperNet.com... Is your mini-site anything like theirs? That's why I created the Mighty Minisite template... To give you that "dependable" look and gain the trust of your website visitors immediately.
