

# Google Keyword Scraper With Private Label Rights

[DOWNLOAD HERE](#)

What does the program do, exactly? The user adds a root keyword into the program, something like "SEO tips" and chooses a save location. The user then clicks the "Go" button, and the program heads to Google, and starts capturing keywords from the Suggest feature - that thing that pops up suggestions when you type in a keyword. License Terms: [YES] You can sell this as your own [YES] This can be given away [YES] You have near exclusive rights (only 20 copies sold - TOTAL) [YES] You can edit this program [YES] You can sell resell rights [YES] Can be added to membership sites [YES] Can be sold on auction sites [YES] Can be sold on dimesale or 100 commissions [YES] You can do ANYTHING you want with it...
