

Premade AdSense Integrated Website Templates With Full Rights

[DOWNLOAD HERE](#)

This is a 3 pack of 3 separate website templates with a ton of really customizable and usable features. With these templates you'll have the ability to freely advertise your amazon products with a customized amazon ad widget which will show products for sale through amazon that you can make money with with your amazon affiliate or amazon associates id. You also have the ability to edit, delete or change the articles that are included in each template or create your own articles. Included are 3 themes: Mountain Biking, Image Consultant and Car Detailing which can be edited or changed to a theme of your choice simply by changing the banners and the text and editing the title of each template. Look at the image carefully. These templates have an abundance of excellent features like the ability to create link partners 24 hours a day as well as approve or disapprove any link partners in the admin interface. The adsense integration is absolutely unmatched as ads will show on each page in several sections pertaining to the content you have created in your articles. You'll also get an automatically generated news section updated daily and top rated related videos on each page inside of each template. These are completely customizable and can be rebranded and resold as you wish. Each of these templates also comes with its own premade sales website where you can list each of them for sale individually or combine them in a package as you see here. I have made as much as \$90.00 per template per sale just to give you an idea of the sales potential not to mention the adsense and amazon income potential.
