

Wordpress Page Peel Script

[DOWNLOAD HERE](#)

This is a script to add a page peel to your wordpress themes... (whats a page peel....?) check out our site.. blog-skins.info once the page loads look in the right corner.... thats a page peel. we use it to advertise things we sell or for affiliate links this script comes in 2 forms. just the script.... and pre built in to a theme simler to the one on our site with full instructions on how to edit and include it in any theme. on a side note the theme we have built with the peel included we also included a second navigation bar thats easy to edit in the theme editor in wpress.. the theme is also adsense / bidvertised ready. using the advert size of 468x60 just edit the bidvertiser php file in the wpress theme editor with your adsense / bidvertiser codes.....
