There are billions of dollars of product sold every year in online businesses alone and its continually rising! But the secret to getting your product, service or offering to make money online is targeting the right people with your offer. I realize that you may be a bit confused as to what it takes to get targeted visitors to your website and may not know where to start but Im going to help you understand... Getting targeted visitors to your web business relies on one thing... Keywords. You want hundreds and thousands of keywords to maximize the chance you have of generating traffic to your website. This is what the big boys know that most people working from home dont; the person with the biggest keyword list gets more traffic, period. But how do you generate a big keyword list? Its always taken loads of time and tedious research to generate keyword lists with loads of entries because you have to find them one at a time while doing search engine searches. After going through this myself for years, I knew that there had to be a better way but I just couldnt find anything that did the job. I set out to create something that did this myself and...
