HTML PROTECTOR STOP PEOPLE FROM RIPPING OFF YOUR HTML CGI script that prevents right clicking to save images from your HTML and also prevents viewing source code AND downloading the HTML. Completely stops snaking HTML and importation by busting up links trees. This will annoy the hell out of those losers ripping off your HTML source code for sure. It's not 100 bulletproof but will stop 99.99 of the idiots that can't create content that's for sure and will give them one hell of a headache trying to rip off your site.
