Easy Banner Maker Pro Version 2 Persona Use License Save $100's On Banner Design Fees and Create Amazing Banners Yourself Any Time You Want, In Minutes! Need website banners for your site? Looking for a way to save money on design fees? Need more promo materials (banners in all sizes) to give to your affiliates? What if you could simply design these banners yourself, in minutes, any time you needed to? Well look no further, because I have the perfect solution right here for you..... What I have for you here is a do-it-yourself banner "maker" unlike any other. The problem with most other banner templates and "generators" out there is that, to put it simply, they just don't create the results you're looking for. You know what I mean.... You buy a banner pack or a software, try to use it, it ends up being too complicated and after hours of wasted time you end up with an amateurish design. So you end up hiring a designer, and in the end you've wasted money and time. Or worse yet, you decide to keep that amateurish banner and waste even more time and money with it. And after this whole process, when ever you need banners in the future, you just decide to skip this whole step all-together. And you end up missing an important piece of your overall marketing campaign that can bring in new leads, sales, and more business. Having professional banners in your marketing arsenal is a great way to squeeze more out of your business. But it does cost extra money, or takes too much time to try and do yourself. Well, what I have for you here is something different. Something that creates GREAT looking banners, in minutes. And something that you can do yourself and save hundreds of dollars on design fees. AND also something you can start using right away, without a huge learning curve, or pretty much with no design experience at all. Introducing... The Easy Banner Maker Pro Version 2 "System" Explained: What makes this special is the ease of use, and the quality of the final banners ANYONE can create, with no design experience. The way it works is, you pretty much get all of the "elements" that make up a professional banner design, all pre-formatted for you an ready to go. And all you have to do is put all of these "elements" together, in your own ways, by copying and pasting them. It's like a "paint by numbers" system, or a building blocks system. Very easy and powerful stuff. Watch the short video above to explain how this works and to show you this thing in action.. Here Is Exactly What You Get.... 1. Master

Templates (Brand new set for V2) First, you get the "master" templates in all of the most popual banner sizes. You get 8 of these master templates, in 8 sizes (in pixels): 120x600, 250x250, 200x200, 468x60, 120x240, 180x150, 125x125, 234x60. These master templates come pre-installed with background patterns, and background "shapes". These patterns and shapes basically add some flair to the banners, and make them more exciting then just plain solid color banners. These master templates are the starting points for the banners, and you can pretty much use just these templates to create some nice banners for yourself. But that's not all because you also get... 2. "Copy and Paste Elements" (Brand new set for V2) These are basically pre-formatted "elements" for the inside of your banner design. They're things like text, bullets, and buttons. And all of these come pre-formatted with cool effects and styles applied to them. And you can simply copy and paste these into your own designs and the master templates. You can customize all of these "elements" in pretty much any way you want. Change the text to your own exact text, change the fonts and sizes of the text, change the colors, resize, rotate, distort and pretty much do anything else to all of these. You can even use most of these things for high res print graphics (300 DPI). Here are these "elements" that you will get..... Layer Styles (Brand new set for V2) To make it easier for you to customize the "copy and paste elements" and the master templates, I'm also including over 180 layer styles that you can apply to your graphics with just a few clicks. Just choose the "element" or any other graphic you have, click on the layer style, and it instantly get's applied to it. There are 2 variations of these styles: 1 set with drop shadows, and one without. Plus I'm also including a separate PSD file with all of these layer styles on their own layer, so even people with Photoshop Elements can easily apply these layer styles to their graphics. 4. Step-By-Step Video Instructions. You also get step-by-step video instructions on how to use everything, so you'll be up and running right away. In one of the videos I re-create one of the sample banners that you see on this site in real time. You get over 30 minutes of these video instructions. As you can see, you get a lot with this package, and it's very customizable and easy to use. Plus, to make this deal even better, I've added a special bonus.... Special Extra Bonus As a bonus, I'm going to also give you the layered PSD source files to the banners I've used as examples on this site. You'll get these same exact banner designs, with all the layers intact, so you can customize them with your own details. Add your own text, images, move things around, etc.. Everything is already nicely layed out for you, and you can customize EVERYTHING you see on these banners. This should give you an even quicker start towards creating your own banners. Quick FAQ: Q. Do I need any special

software? A. Yes, you need either Adobe Photoshop or Adobe Photoshop Elements. Q. I thought Photohop wasn't required? A. It's not. This product works with Adobe Photoshop Elements (which is NOT the full and expensive Adobe Photoshop, but rather a lighter and cheaper software). Not all people can afford Photoshop, but everyone can afford Photosho Elements, which is under a $100. And if you already have Photoshop, you CAN use it. Q. Is this easy to use? A. Yes, very easy. All you have to do pretty much is choose the "element" that you want, customize it in your way, copy and paste into where ever you like, turn on or off a few effects, and move things around. It's like a "paint-by-numbers" system, with no design skills required. And it all comes with step-by-step instructions. Q. Can I add my own images and graphics to the templates? A. Yes, these templates are highly customizable. You can add any images you want, any graphics you want, any text you, and pretty much anything else you want. You're not limited to the pre-installed things already in place. Q. Are there different sizes of banners to choose from? A. Yes, there are 8 sizes to start from (in pixels): 120x600, 250x250, 200x200, 468x60, 120x240, 180x150, 125x125, 234x60. Plus you can also resize the banners futher to create the exact size that you want. Tags: pro, v2
