Handy Color Schemer Software Program With Full Master Resale Rights. Handy Color Schemer Design Software Now you can stop wondering and envying how the pros can create the best looking sites every single time using only the best and most delicious color schemes that'll make you drool..... "They say, a well-considered color scheme is frequently the difference between a reasonable web site and a great web site....now are you ready to join in the ranks of professional designers just by having your copy of the Portable Color Schemer...." Just like you, I used to spend too much time deciding on a color theme that would'nt make my sites look to skanky and cheap? You might agree that one of the most daunting task in creating a website is deciding on a color scheme. And just like you I used to design my sites from scratch without a single clue as to what my site's color scheme should be. I used to go through other sites spying on their color themes and getting their color hexes together but to my surprise it doesn't look right! Its like something is missing. Can it be the hues? The tones? What is it?..... You see... not many professional designers will tell you that even they have a hard time creating a color theme for a website from scratch. Best of all, most of them were paid to provide you with a pleasing color combination that will.... believe me or not, boost up your conversion rates and give you more profit on a dollar. This is a typical scenario for us marketers. We need to design sites fast, to the point and of course save every single bit if possible by doing it ourselves! Simply put... What If You Had: 1. A simple solution that will make any of your website designing a breeze, by allowing you to be able to pick an effective color scheme with just a few clicks of the button? 2. Get deliciously professional color tones for your site even when you don't have a single clue of where to start by using a random generated matching color scheme? 3. Create a lasting impression by giving affirmative colors that will influence your online sales! 4. Enjoy complimenting color schemes at any time anywhere (Its portable). 5. Easily spot web safe colors with a special built in function that analyzes every single color and tells you if the colors are safe for web! 6. Resell this amazing product and keep 100 of the profit to yourself! This will all sum up to the ultimate benefit ... Now imagine this ... Lets say if you have a great product, great support and great marketing skills and now it time to set up that site, wouldn't it be great if you can position yourself against the competitor and complement every

single effort you put into your product or services by having a tightly themed website with colors to die for. Or allow you to have an equally profitable or better converting website by not relying on "blue" alone which has made most websites look the same...Instead you can use the other matching colors in this amazing tool that will complement blue and still differentiate yourself by clicking a single button!
