

# File Mailer Script

[DOWNLOAD HERE](#)

File Mailer Script FileMailer lets you require visitors to submit their name and email address in order to retrieve a file from your site. Upon submitting the information, the file is sent to the visitor via email. This is a great way to stop leeching and third-party linking of your files, and it also lets you know exactly who's obtaining your files! You can use the stored name/email address info to build a mailing list or newsletter.

FEATURES 100 templates Simple and quick to set up Prevents leeching and third party linking Files are sent via email, not via download Visitors must give a valid email address to get a file Tracks how many times each file is retrieved Records the name/email address of each downloader SUPER BONUS: Order now and receive MASTER Resell Rights so you can sell File Mailer Script and keep 100 \$\$\$ of the profits! You'll even get a copy of this sales page which you can easily customize!
