"Amazing Secrets Of A Black Belt JV Broker" Are you looking for one of the easiest ways on the entire Internet to make lots of money FAST and EASY? Let me let you in on a secret... The easiest way is NOT by creating and marketing your own products or services! The easiest way is NOT by buying or building a huge list and then emailing them offers! The easiest way is NOT by selling affiliate products! The easiest way is NOT by trying to drive traffic to a product sales page using pay-per-clicks or other traffic generation methods! So what IS the easiest way? The easiest way I've discovered to make lots of money online fast and easy is to leverage other people's lists and website traffic. You do this by being a "middleman." You put the people with the product.... together with the people with the list or website traffic, and you get a percentage of ALL the sales while THEY do ALL the work! You become what is often referred to as a JV broker... "Renegade Internet Marketing Guru Reveals One Of Internet Marketing's Most Hush-Hush Secrets" The concept of brokering joint ventures is really nothing new. Direct marketers have been doing it for decades! People like Jay Abraham and Dan Kennedy have long taught students to find list owners and get them to mail offers to their lists for a share of the profit. Jay even teaches setting up 3 or 4-way joint ventures. The Internet just provides an easy way for "the little guy" to get a piece of the action too! So Why Don't They Teach You This In The "Internet Marketing Courses? Maybe they want you to spend all of your time and effort as an affiliate... selling their products and making them money! Maybe they don't realize how lucrative being a JV Broker is! Maybe they want to keep all of the easy money to themselves! Maybe they just want to keep you buying the endless new ebooks and courses containing half-baked, time-wasting, usually very UNPROFITABLE theory that they cooked up. Maybe they just don't understand the secrets you're about to learn! And why should you believe I'm going to share with you anything MORE useful? You shouldn't... you should believe your own eyes, and the emperical evidence that you see all around you but choose to ignore for some reason. Look at how any of the BIG Internet marketers operate... They create products, and then with the help of a broker, they get all of the big list owners (and owners of websites with incredible traffic) to promote their products. This system is so lucrative that they can sell new products as fast as they can create them. This

system is so PROFITABLE that they actually PAY people to go out and set up joint ventures for them. They "out source" the JV brokering because product creation is what they do best. That's Where The Opportunity Is Created For You... If you understand how to correctly approach and set up joint ventures your services are in BIG demand. The fact is that having the greatest product in the world is worthless without proper marketing. This is why over 95 of new Internet marketers fail. They never master the marketing. Many much-needed, high-quality products never get off the ground due to poor marketing. That's Where The Opportunity Is Created For You! You don't have to master marketing to make an online fortune. You need to master approaching those already in contact with your target market and convincing them to promote your product or your clients' product. It's that simple.
