Hey Internet Marketers and Webmasters! Need a fast, affordable way to take advantage of the online video revolution? Introducing VideoWebWizard... The Easy Way For You To Start Using & Profiting With Online Video This Software Is So Simple That You Could Have One Or More Streaming Videos On Your Website Just 10 Minutes From Now Just 10 Minutes From Now! Dear fellow Internet Marketer or Webmaster, Whether you like it or not, a new kind of internet is here: A videoized internet. Ten years ago, video was not common on the internet. But today, video is becoming a standard for websites. (Want proof? Google recently bought YouTube, the online video sharing site, for \$1.65 billion in stock!) What does this mean for YOU? You must ask yourself if you are going to keep up with the new video standard. Because if you do, you are going to make EASY PROFITS. You see, your customers are READY for online video right now. Theyve been exposed to the idea already through sites like YouTube and other video sharing sites. And they like it. All you have to do now is start using online video. It will spark your visitors interest and make them pay more attention to you. In other words: PROFIT! But look at the flip side of that too. If you dont start using video and start catching up with the industry standards, you are going to simply THROW AWAY potential profits. Long-term profits, too. Maybe youve thought about starting to use online video for your websites, but just havent done it yet. If that describes you, listen up. Im about to crack the whip. :) 3 Excuses People Use For Not Taking Advantage of Online Video Excuse #1: I just havent gotten around to it yet. Bad excuse! If you own a business of any kind, you need to be alert about trends and changes in your industry and be ready to act upon those changes to build your business. If you dont, your business could be left in the dust. Especially with online businesses and websites. Things move much faster on the internet than they do in the normal business world. The internet has changed so much in the past 15 years... its unbelievable! You must be alert to keep up with it - dont put things off. Excuse #2: Making video for my website is too hard, expensive, and time-consuming. Not true! Nowadays, you can get a decent digital camcorder for less than \$199. And if you have Microsoft Windows XP or higher, your computer is all ready to go with free video editing software called Windows Movie Maker. But what if you dont have the budget for a digital camcorder?

(Even though its a great investment) You can still use video to your advantage on your website! For example, you can just get a \$20 webcam and start using it to record short messages for your website or newsletter. This will build trust with your website visitors or newsletter subscribers. In fact, a lot of online marketers use this technique simply because it works (it seems personal), its cheap, its easy, and its fast! Excuse #3: Its too hard and too technical for me to put video on my website. Not anymore. This may have been true in the past, but with new solutions like the one Im about to share with you, youll never be able to use this excuse again! Tags: website design
