Fb Fanpagepress New Version

[DOWNLOAD HERE](#)

This version of FB Fan Page Press Includes a ton of features that the original didnt even have a hint of! You can now create fan pages and change the header with the push of a button. Upload headers and change the background right from the dashboard. We have also included 20 preformed headers All you have to do is add yours or the clients content and upload the header right into the theme! Make your clients pages viral. We have included advanced share buttons for both facebook and twitter. The facebook button shares the fan page right on facebook. Enter in any message youd like, click the share button and you have started the viral loop. The Twitter Button posts a pre-selected message and link to your page, website or affiliate link directly into twitter. Press send and have your visitors drive traffic to your offer! And it al happens from the dashboardNO CODING A WordPress Theme Formatted For Facebook Fan Pages Social Media Share Buttons Complete Training 20 Header Graphics Notification Of Updates Addons As They Become Available
