You are about to take the next step forward in modern spirit communication... This is the evolution of EVP. This exclusive software package has been put together by famous psychic and paranormalist Jason Profit to help you make contact. Please read this entire auction... Introducing CrossTalk EVP Software! According to Wikipedia Electronic voice phenomena (EVP) are sections of static noise on the radio or electronic recording media that are interpreted by paranormal investigators as voices speaking words usually attributed to ghosts or spirits. Recording EVP has become a technique of those who attempt to contact the souls of dead loved ones or during ghost hunting activities. In addition to deceased spirits, various paranormal investigators say that EVP could be due to psychic echoes from the past, psychokinesis unconsciously produced by living people, and the thoughts of aliens. According to parapsychologist Konstantin Raudive, who popularized the idea,^{2]} EVP are typically brief, usually the length of a word or short phrase. What is a ghost box or franks box? The ghost box or franks box is truly a unique concept ... a sort of spirit telephone system if you will. You can literally ask questions and get answers... LIVE in REAL TIME! Unlike EVP recordings where you have to go back listen to what you have recorded, with these ghost boxes you have full 2 way communication with the other side. Of course you will need to practice in order to get the best results. Sometimes the messages are clear and easily understood, sometimes they are more intermixed with random sounds and audio bits. Frank's invention was experimenting with some old software one day when he came up with the idea of building his frequency scanning device to help aid in spirit communication. The thing is, ORIGINAL franks boxes are rare as he does not build them for sale. The inexpensive ghost box... The most common affordable option was discovered by a fella named sumduc... he figured out it was possible to modify certain am/fm radios to allow a constant frequency scan which functioned very similar to a franks box for spirit communication. These are the ghost boxes you see for sale on ebay right now. Both the franks box and cheap ghost boxes are amazing tools for the paranormal researcher... but now there is a better way to talk with the other side! Rumor has it that Edison was even working on a spirit telephone before he died... The next evolution of 2 way spirit communication has arrived! You do NOT need one of those hacked up radios to
