Let's face it. cPanel is currently the most popular & user-friendly control panel for web hosting accounts, period! However, most newbies do not have a clue on how to use them. It could take you hours trying to figure out how to use the features. But instead of knocking yourself out trying to search with just the right learning tools, you can now have an entire collection of my hard-hitting online video tutorials for you, ready at your beck and call.

2. Internet Marketing Basics Videos Dear Friend, Do you know that when you're starting out on an Internet business, you will come across A LOT of new challenges that are RARELY being told by most people? Step-by-step guides are a good way to start and that really cut down on your learning curves. However, Most marketing manuals teach you WHAT to do instead of showing you "How To Do" I have heard the same questions over and over again from many newbies on how to setup their online business. Things like... How do I register a domain name? What the heck is 'DNS' and how do I change them? How do I register a web hosting account and get my site set up? How do I install popups on my website? How can I let customers automatically download my product? How do I set up an autoresponder? How do I process my orders? How do I setup my order links? How can I upload files to my webpage? You simply cannot setup a business on the Internet without knowing these and other basics steps. So, I decided that I was going to put together a series of online videos to help newbies cut their learning curve drastically and eventually get their own Internet business up and running a whole lot faster and easier.
