Would you like to learn what the guru's are actually doing themselves to make a killing month in and month out without writing? They have other people do the work for them! We call this visitor leverage... If you answered yes to either of the above questions you are in the right place at the right time. You are about to learn how to have other people do yourcontent creation for you free of charge! Welcome to what could be the most important letter that you've ever read when it comes to content creation on the Internet. We've all read the eBooks and listened to the audios from gurus who say that you have to create tons of content if you want any chance of having a high traffic, high profit website. But who has the time to create hundreds or even thousands of pages of content in multiple different niches? Most people just don't have the time to commit to writing that much content and for good reason, writing is laborious hard work. It's just not a realistic expectation for everyone to b able to churn out content like that of a prolific author. But the gurus do have it right to some extent... Without Unique Content, Your Website Doesn't Stand A Chance Of Getting Any Real Traffic... As I'm sure you're aware, the Internet is run by content sites. 99 of all the traffic available online goes to websites that offer unique content that just can't be had anywhere else. It only makes sense that if you want to get a ton of traffic (and sales as a result) that you are going to need unique content and lots of it. Unique content will please the people hat come to your websites which will please the search engines thereby increasing your search engine rankings. If you don't have any unique content on your website or very little, you better have a big ad budget to spend on pay per click advertising because search engines don't give favor to websites that don't have tons of content. But having unique content alone isn't enough.. You Need Fresh, Updating Content To Keep Visitors Coming Back And Search Engine Spiders Interested! What most people don't know is that having unique content

on your website just isn't enough to keep consistent traffic coming to your website. Sure, when you put up a bunch of fresh content you will get traffic but after a while, the search engines will start to take notice if you don't have any updates to your website. The main reason for this is that the search engines want to bring their searchers the freshest, up to day content available. This means that if they can find a page that has similar content that was updated yesterday and your page hast been updated in a month or two, chances are the ranking is going to go to the new page. This probably has your head spinning and I can hear you saying "How am I not only going to create a bunch of unique content but update it on a regular basis?" and that's a great question and the solution is right in front of you...
