

Swoopo Clone Script

[DOWNLOAD HERE](#)

Taking and expanding the reverse auction website concept, this website offers registered the chance to bid on auctions and pay a fraction of the retail price. The website owner has the ability to control all aspects of the website, from adding and editing auctions, to refunding bids and suspending users.

Features: cakephp based full ajax framework no kind of encryption at all (no other clone features) and many more... You will find inside the package a Self Extracting Archive that contains the script and install instructions. If you follow them exactly, the script will work fine. The script was recoded by ME, so that the mail function works perfectly on any webserver, that means that this script is unique, tested and working !!

! An exact working clone of Swoopo / Telebid / Grababid website using the Penny Auction method.

Upload all files to the server. It includes several templates for changing the layout. You will find no COPYRIGHT restrictions on the script, so after you buy it you can sell it.
