Running down blogs and posting to them can eat your time It could take you hours a day to find relevant blogs and post a comment with a link. Not to mention the carpal tunnel syndrome and eyestrain youll get. Ive been there. I used to spend, like, six hours a day getting keywords from Google Sandbox and Overture, then hunting down blogs with those keywords, and posting comments with a link back to my site. Then, I got an idea. I spent a week writing down how much time I spent doing all that blog stuff, then I looked at what my site was bringing in. Know what I was making per hour? \$10. Thats right, \$10 an hour. I couldve made more working fast-food. At that point, I realized there had to be a better way! I had to automate this process if I was ever going to make it pay off. My requirements: I needed something that would automatically: 1. Take my keywords or keywords from Google Sandbox or Overture. 2. Find blogs with those keywords. 3. to my site in the post. 5. Increase the heck out of my site traffic. So, in desperation, I called a software developer friend of mine. There had to be a better way. And there was! (And no, I will not divulge his name. Ive got him working on a new project, and hes so good, hed be stolen instantly.) After extensive research, he figured out what needed to happen and he went to work. He developed the tool Blog Link Generator. It finds revelant keywords, finds the blogs, and then posts a personal comment right from me!
