

Perl Scripting For Windows Security: Live Response, Forensic Analysis, And Monitoring - Harlan Carvey

[DOWNLOAD HERE](#)

This book is intended for anyone who has an interest in useful Perl scripting, in particular on the Windows platform, for the purpose of incident response, and forensic analysis, and application monitoring. While a thorough grounding in scripting languages (or in Perl specifically) is not required, it is helpful in fully and more completely understanding the material and code presented in this book. This book contains information that is useful to consultants who perform incident response and computer forensics, specifically as those activities pertain to MS Windows systems (Windows 2000, XP, 2003, and some Vista). My hope is that not only will consultants (such as myself) find this material valuable, but so will system administrators, law enforcement officers, and students in undergraduate and graduate programs focusing on computer forensics.*Perl is the third most commonly used programming language in the world*Helps security professionals in updating settings on a remote server several cities away, collecting data for a report to management, and more*The companion Web site for the book contains dozens of scripts the reader can download and use todayAuthor: Carvey, Harlan Publisher: Syngress Illustration: N Language: ENG Title: Perl Scripting for Windows Security: Live Response, Forensic Analysis, and Monitoring Pages: 00232 (Encrypted EPUB) / 00000 (Encrypted PDF) On Sale: 2007-12-12 SKU-13/ISBN: 9781597491730 Category: Mathematics : Applied Category: Computers : Security - General Category: Computers : Computer Science
