

Steinway D Giga 2

[DOWNLOAD HERE](#)

Steinway D GigaSampler Piano We recorded the best grand piano we could find. This particular instrument is in premium condition, a Steinway model D3 with serial number 393210 which was built in 1965. It was fully refurbished by Steinway Hamburg in 1999. This piano served the Rotterdam 'DOELEN' concert hall for several decades, where hundreds of famous musicians, from Claudio Arrau to the Rolling Stones, performed for live audiences and broadcast concerts. We captured up to 6 articulations (PPP, PP, P, MF, F, FF and FFF) for sustain pedal up, sustain pedal down and 4 articulations for the release triggered samples. We recorded the samples using the finest digital equipment available. Prism Sound, a 24-bit ProTools TDM Mix+ system and Waves processing was used. We have mapped up to 16 levels of velocity, true multiple velocity release layers, ultimate staccato, and sustained pedal-down samples with a carefully chosen amount of resonance. The library has 5 GB of samples. The end result was tested by several concert pianists, who helped us develop a sampled instrument which could meet their highest expectations. There is no doubt in our minds that this is the best sampled piano ever.
