

Computational Colour Science Using Matlab - , Caterina Ripamonti

[DOWNLOAD HERE](#)

Computational Colour Science Using MATLAB 2nd Edition offers a practical, problem-based approach to colour physics. The book focuses on the key issues encountered in modern colour engineering, including efficient representation of colour information, Fourier analysis of reflectance spectra and advanced colorimetric computation. Emphasis is placed on the practical applications rather than the techniques themselves, with material structured around key topics. These topics include colour calibration of visual displays, computer recipe prediction and models for colour-appearance prediction. Each topic is carefully introduced at three levels to aid student understanding. First, theoretical ideas and background information are discussed, then explanations of mathematical solutions follow and finally practical solutions are presented using MATLAB. The content includes: A compendium of equations and numerical data required by the modern colour and imaging scientist. Numerous examples of solutions and algorithms for a wide-range of computational problems in colour science. Example scripts using the MATLAB programming language. This 2nd edition contains substantial new and revised material, including three innovative chapters on colour imaging, psychophysical methods, and physiological colour spaces; the MATLAB toolbox has been extended with a professional, optimized, toolbox to go alongside the current teaching toolbox; and a java toolbox has been added which will interest users who are writing web applications and/or applets or mobile phone applications. Computational Colour Science Using MATLAB 2nd Edition is an invaluable resource for students taking courses in colour science, colour chemistry and colour physics as well as technicians and researchers working in the area. In addition, it acts a useful reference for professionals and researchers working in colour dependent industries such as textiles, paints, print electronic imaging. Review from First Edition: highly recommended as a concise introduction to the practicalities of colour science (Color Technology, 2004) Author: Westland, Stephen Author: Ripamonti, Caterina Author: Cheung, Vien Publisher: Wiley Illustration: N Language: ENG Title: Computational Colour Science Using MATLAB Pages: 00376 (Encrypted EPUB) / 00376 (Encrypted PDF) On Sale: 2012-06-29 SKU-13/ISBN: 9780470665695 Lib Category: Colorimetry Lib Category:
