I will take you by the hand and show you from the very beginning, the core skills that you need to have so you can start generating traffic and making money. It's really that simple. Dear Friend, You've probably heard all about "internet or affiliate" marketing by now, and how thousands of people are quietly earning a fortune working from home in their pajamas. Do you need to be a marketing expert to be successful online? No, in fact internet marketing is a lot easier than many would lead you to believe. It is within your reach. The problem is, so many resources and courses out there assume you already know x, y, and z. Let me start with you from the beginning. Stop spinning your wheels and let my toolkit show you the way! Introducing... The Ultimate Internet Marketing Toolkit - The Video Series - It is not hard to make money online, as long as you know what you are doing. Allow me to give you the benefit of my expertise and experience. I've sold countless products online, and have learned through my successes and failures what works. I created this video series specifically to help people just starting out in the internet marketing field. There is a right way and a wrong way to do internet marketing (the wrong way would be sinking an endless amount of cash into lesson after lesson, not having a clear plan of action). I don't want to see you wasting your time doing things the wrong way, that is why I created this video training series. * A Collection of 31 Professionally Recorded Videos-This complete video series will teach you everything you need to know about getting started with internet and affiliate marketing online. * Why You Should Do Affiliate Marketing- Before you take one step further, I want you to understand the advantages of internet marketing, so you can best take advantage of them. * The Best Internet Marketing Methods- There are tons of ways to be successful online, in this section of my toolkit, I will give you a rundown of the six most popular (and profitable) methods. * How to Find and Register a Domain Name - If you are going to do online marketing, you will need a domain name. I will show you how to pick a great one, and you will get to watch me over my shoulder as I register one. * How to Setup a Hosting Account- In order to have a true presence online, you will need to have a website, which of course needs a hosting account. In this section of my toolkit, I will teach you what you need to know to setup and run your very own hosting account. * How to FTP- Inevitably you will need to be able to upload files to your website, I will show you

how. * How to Edit Your HTML Files with a Fantastic Free Editor- I will show you a HTML (web page) editor that I use that doesn't cost anything! * How to Create Your Very Own Web Pages- I will show you how to start building basic HTML web pages, including how to create hyperlinks, insert images, and more. * How to Use Meta Tags Effectively- I will show you how to use meta tags to tell the search engines exactly how important your web pages are. * How to Develop a Marketing Mindset- I will show you how to develop a "profitable marketing mindset". This is a section you absolutely do not want to miss! * How to Avoid the Newbie Pitfalls- Don't make the same mistakes many "newbies" do, I will share the most common mis-steps beginning marketers make. The Ultimate Internet Marketing Toolkit will show you how to get started in the mysterious world of internet marketing...
