

Translate Pro 12 German/english

[DOWNLOAD HERE](#)

The professional translation system for highest demands. With the most detailed vocabulary of the product series, including IT, business, law, and more. Featuring the new, intelligent AutoLearn technology, this system can adapt to your translation needs with ever greater precision. Your translations gain in quality, with considerable time and cost savings. * NEW Adaptive and flexible: AutoLearn searches through the edited translation and entire translation memories for new uses of words that are then presented in an overview as suggestions for dictionary entries. New dictionary entries can be adopted automatically or after editing in your custom dictionary. In this manner, the system utilises its translation knowledge to improve considerably the correct use of word translations. * NEW Selection dialog for the optimal translation variants: The new TranSelect-technology is a flexible tool for selecting from the alternatives the translation best suited to the context. TranslateContext utilises its context knowledge to present you with suitable alternative translations for words. The grammatical relationships are corrected automatically. The word translations you select can be easily adopted for the current sentence or the whole text. * NEW Context sensitive searches directly in the target text: TranslateDictpro integrates the functions of the multi award winning office wrterbuch pro for enhancing even further the quality of your translation. You can therefore easily retrieve translations both in Windows applications and in the target text. TranslateDictpro conducts a context sensitive analysis by back translating the results returned by translate. * Professional creation and management of dictionaries and translation memories: Organise your personal or corporate vocabulary, and create your own professional custom dictionaries. In this manner you can not only add any amount of data to the integrated system dictionary, but update and manage every detail of your terminology. At the same time, the system lets you save e.g. your translation work, frequent standard formulations, etc., in translation memories. You will then avoid unnecessary repeat translations when the system identifies similar source texts, and you save time and money. * Direct translations of single sentences or short texts: click & translate translates directly in any Windows application, accessing directly the translate software component and dictionaries. * Direct translations in MS Office and PDF: The Office add-in transfers the translate pro functions directly to Word, PowerPoint,

Excel, and Outlook. Your familiar and accustomed environment now provides new options for translating documents, tables, presentations, and email as soon as they are generated, managed, or received, and for looking up words in the application you are working with. Also PDF files can be translated directly in Adobe Reader and Adobe Acrobat with the PDF plugin. * Direct and easy translations of web pages: translate web lets you translate whole web pages directly in Internet Explorer (Version 5.0 or later), retaining the layout and functions. Moreover, translate web allows you to access the translate dictionary directly for convenient searches. An additional web plugin is also available for translating web pages directly in Firefox. * Easy to use: The TranslateAssistant helps you to find quickly the best possible translation. This interactive wizard features an Assistant info window that keeps you informed at all times on the status of the translation, the translation settings, and the text details. The TranslateAssistant also helps you to navigate by presenting you with a list of possible followup activities. * TMX converter: The integrated interface for the direct exchange of translation memories with Trados and other TM systems. * Fast access to WWWtranslate.de: The WWWtranslate interface also takes you quickly and easily to the Lingenio online translation portal. There you will find a large number of additional usages for your research. System requirements: PC from 400MHz, 32MB RAM, 200MB free fixed disk storage, CD-R drive. Windows 2000/XP/Vista/Windows7 (32Bit/64Bit). Optional: from Internet Explorer 6, Firefox from 1.5, MS Office 2000/XP/2003/2007 (32Bit) Release: 2010
