How To Make A Killing By Creating Your Own Software Empire Even If You Dont Know How To Program Your Own Remote Control! Get yourself a drink, slam the door shut on your office, and get ready for an all out revealing ride into the thrilling world of extremely profitable software development! Dear Friend, I hope you are ready to finally take the Internet by the horns and start making a livable income creating and reselling your own software programs because thats exactly what you are going to be able to do after you read our software outsourcers information below. I believe that you deserve to know all of the tricks when it comes to making money creating your own software and I am not going to hold back one little tidbit of information. You may already be intimidated when you think of actually creating your very own software and you most likely already think Where and how would I even start? You may also think developing and reselling your own software is much too expensive and complicated for you to get involved in. But, dont worry, by the time you finish reading this letter your mind will be at ease and a confident path will be laid before you step by step, leaving nothing out. And NO, it will not cost an arm and a leg and it will not be hard for you to do at all! One thing is certain... You want to get involved in having your own software created as soon as possible because... The Software Market Is Red Hot & there Are Millions Of Hungry Buyers All Over The Net, Just Waiting To Order YOUR Newest Creation! The opportunity is wide open for you to cash in on the booming software market. Its a fact, the little guys and gals just like you and me are making a killing turning our ideas into profitable software solutions and selling them on the Internet regardless of if you are working from an office, or just from your home! Software is one of the biggest selling products in the entire world, and it has one of the highest possible margins. Create it once and sell it over and over. Regardless of if you sell 10 copies or 10,000 copies, you only have to pay your creation costs once! Why is software so hot? Because it automates tedious tasks, helps people do things that were once hard to do with ease and saves people loads of time. Youre About To Learn How You, Too, Can Quickly & Easily Cash In On The Highly Profitable Software Development Business! Basically software makes life easier for people and saves them loads of time, and in a world that moves so fast, time and solutions to peoples problems are very important. If you can offer something that is going to

save people time, money or frustration, people will gladly pay you handsomely for your solution. In the last 10 years software sales have shot up and are not going to stop anytime soon. Software is here to stay forever and you need to get on the band wagon! I know, I know...Youre probably thinking I cant design or program software! And with what you know right now, you may be right. But after you read Millionaire Software Tycoon Secrets, that will all change.. I Guarantee It! Bring All Your Ideas Come To Life By Handing Them To An Outsourcer Who Will Do All The Hard Work For You! You dont have to know how to write a single line of code or know the first thing about programming and you can have beautiful software designed. There are tens of thousands of programmers all over the world that are extremely hungry for a chance to work so its very easy to find someone to write your project! This is great news for you. Just by following a few simple secrets on working with an outsourcer, you can just sit back and relax as your idea turns into a full fledged software product that thousands of people will want to buy! Would you be interested in having the next hot software on the Internet without writing a single line of programming code or without having to deal with any of the technical hassles? I bet you would! Its Not Hard At All To Have Awesome Software Created For You, And Ill Teach You & Show You Why That Statement Is True. The best part of the whole outsourcing way of doing things is no one will EVER know that you or your software marketing team didnt personally write the software code! Thats whole point of hiring an outsourcer! You pay them for their work and it then becomes your property which means you become 100 percent the author of the software! How cool is that? The next logical thought you may have is This must have to be really expensive to hire a person to do all the programming but the truth of this matter is... Until Youve Actually Done It, Its Difficult To Ever Imagine How Truly Cheap It Can Be To Have Someone Else Write Your Software For You! When you think of working with a programmer or software designer you probably think that it costs thousands of dollars to have your ideas turned into reality. While this is true in most cases, especially in the United States, there are extremely inexpensive programmers and software designers all over the world that will gladly do your job for what you can afford. You just need to know the secret places they hang out. (Most people dont know these places, but you will VERY soon). And no, this is not some underhanded way of tricking someone into doing your work dirt cheap and then leaving them in the dust. You will Learn The RIGHT Way To Hire An Outsourcer, HOW To Set It Up AND The Things You Need To Avoid At All Costs! The system I am going to show you will teach you how to be completely honest about your intentions and the software you are having written and still get a huge

bargain. Here is a fact you need to realize that may put the whole software opportunity into perspective for you: There are 10 times more programmers than there are programming jobs. That means that only 1 in 10 programmers are working! That also means that they are constantly scouring the Internet for work and willing to work at super affordable rates because there is so much competition for the available projects. This is your opportunity to cash in. This Sounds Great, But Can Someone Like Me REALLY Do This With No Technical Knowledge And Without A Big Bank Roll? There is no doubt that you can do this! Its true, most people are skeptical when they hear that they can start their own software empire on a shoe string but I am here to tell you its absolutely true. You can take advantage of the under worked, highly competitive pool of programmers that are all over the world. This is not common knowledge. VERY few people know about this pool of people just dying to work at cheap rates and the few that do are not talking about it. If you had the opportunity to have dozens of people ready to design your software and competing with each other offering you a lower price would you want everyone knowing about it? You probably wouldnt. But I am breaking that barrier and unleashing all of the secrets for you. You will absolutely be able to have your ideas turned into profitable software with no programming and without breaking the bank, I guarantee it! These Tightly Guarded Strategies Have Been Behind Lock & Key For Years But you are Going To Get The Keys To The Kingdom! I want to emphasize a few things for you. 1) Its easy to find a person to turn your idea into a real, working piece of software that people will pay for. I will show you where to find them and how to deal with them for the smoothest experience you could ever imagine with NO PROGRAMMING. 2) It is not expensive. you are going to learn how you can get these outsourcers to do your bidding for you. You do not have to feel bad offering them a cheap price. They will bid on your project offering you dirt cheap rates and theyll love you for it, if you select them to work on your project! (I had a great piece of software written for just \$60 in one instance and I own all the rights to it and sell it for \$500 a copy, and it sells very well at that price, too!) 3) This does NOT take up boatloads of your time to do. You will be able to monitor the progress of your project in just a couple of minutes a day, I will walk you through everything step by step! Im sure you will agree that these are some truly amazing benefits you will gain and to make sure that the whole system is super-easy for you to follow... Youre Getting The Whole System In An Easy To Follow, Paint-By-Numbers Format Called The Millionaire Software Tycoon Secrets Youre getting insider information from the secret inner world of the software industry that will show you what those big software companies dont want you to know!
