"Kompozer 4 Newbies" Here's What's Inside The KompoZer 4 Newbies Video Series: Video #1. Finding & Installing the Software In video 1, find out where and how to get this free software and install it onto your computer Video #2. Controlling Your Website Layout Learn how to prepare your webpage ready to display your content in a neat and easy to follow format. Video #3. Adding Text & Media Through video 3 you'll see how to add text and pictures to your page as well as how to format and position them. Video #4. Creating Navigational Links Learn how to quickly produce multiple webpages and link them together using hyperlinks. Video #5. How To Insert Video Into Your Pages Keep your readers interested in your site and add video, it's quick, easy and adds real value to your website. After just the first five videos you will be able to create your first website, it really is that simple. Then the following videos will give you an introduction to "CSS" so you will be able to manage your site (and any website templates you download in the future) much more professionally. More From The KompoZer4Newbies Video Series Video #6. CSS part I: Elements of Type This first of three videos which introduce you to CSS deal with elements of type. Here you'll learn how to format regular text, including that important H1 tag that the search engines pay so much attention to. Video #7. CSS part II: Elements of Class Just taking what you learn in video 6 a bit further you will be shown how to define your own formatting so as to give your sites that unified look. Video #8. CSS part III: Custom Styles Here we go just a little deeper into the CSS and you'll see how to add rollover effects to your hyperlinks so as to make you navigation more obvious and attractive. Video #9. Going Live Once you have completed your website all that remains is to get it to your web host for the world to see. This is done with free and easy to use 'FTP' software as you'll see here.
