

Teabag Folding Instructions, Tiles And Backgrounds

[DOWNLOAD HERE](#)

Here's a great pack for card making. Firstly there are ten pages of illustrated instructions on various tea bag folding techniques and medallion ideas to start you off. Then there are four different floral kaleidoscopic tiles in this selection. Each one is shown 20 times on each page at 3.6cm square, and 6 times at 5cm square. Each page also contains a border strip to match. Additionally, there are two background or giftwrap sheets to match and tone with each tile. Of course, you can print them as many times as you like. This is superb value for money as they are contained in a pdf file so you can play around with the print sizes too. You can print them on any type of paper you like, acetate, vellum, or acid free, you decide. If you print the circular ones at different sizes, you can cut them out and decoupage them for a stunning effect. This is the first pack in the series, look out for more tiles which will be added soon - all my own exclusive designs.
