Dear friend, These next two statements will sound too good to be true... But I can prove them both! The creator of this software is selling his script for \$897 and it's flying off the shelves. BUT! When you act now, you can pick up virtually the same \$997.00 software for just \$INSERT YOUR PRICE HERE ! (And still profit like crazy...) How Does This Software Make Money Almost Automatically? An Internet Millionaire (who invented Yahoo Games) was brainstorming ways to sell advertising to websites... and came up with an undisputed, knockdown winner. He simply placed 500 powerful keywords on a page in a random, messy order. And then let businesses pay \$100 a pop to link those keywords to their websites. The day he opened his site to advertisers, he made over \$20,000.00! (Here's a live site made using the script : [click here](#)) - This script can be installed in a domain, subdomain or even subfolder, and you can make as much install on as many domain as you want with a single license! Using this system, 500wordschurned out over \$53,000.00 in 1 week. And new link directory sites are starting to appear. That's why it's important you act NOW before it's too late... Just think of the possibilities. Any niche... EVERY NICHE is a potential gold mine using this system. Which means someone could be getting rich in almost every market online. Warning: make sure to get in early before someone else captures your niche! So he decided to share his software with the rest of the world. The thing is, only the wealthy could afford the \$997.00 price tag! I wanted to recommend it to my friends, clients and list - I just couldn't get myself to recommend a \$1000 piece of software to them. (When most of them can't afford it) Here's where my programming skills come in handy. Instead of asking them to buy the nearly \$1,000.00 program, I built my own! Now I CAN recommend my "Buy Me A Word" software to my clients and list! (Over 100 of them bought it in the first 3 days!)
