Scripts2Sell With MRR Youve purchased this product with Master Resell Rights. You are free to sell it and keep 100 of the profits. Even with only some of the scripts retail values listed above, thats still a Grand Total worth almost \$2,000!! As you can see, with the scripts included inside Scripts2Sell, you can make a Payment Processor website like PayPal, an auction website like Ebay, a Random Payout System Member website like WebStars or DollarRain, a Paid 2 Read Email website, a Dating or Personals website, a full blown online store, your very own Webring, a Subscription website, a Pay-Per-Click website, a Portal or Directory website like Yahoo!, or even create your own Blog-For-Profit website, plus others I havent even mentioned! Most, if not all, of the scripts listed above come with installation instructions making it possible to do installations yourself. In turn, saving you hundreds on installation fees alone! Many times professional programmers charge hundreds just to do one script install, let alone 35! Not only do you receive all those fantastic scripts listed above, but when you decide to purchase today, you will also get Lifetime Upgrades absolutely FREE! That means whenever anything new is added or a new version is created, you will receive it completely free of charge when it is released without ever having to repurchase anything again! But if all that isnt your cup of tea, Scripts2Sell is also a profitable website/product in and of itself! When you purchase just one copy of Scripts2Sell, you never even have to use any of the products found within it to start earning a profit. Because Scripts2Sell has been designed to be resold indefinitely! Scripts2Sell package includes a copy of this exact salespage, an easy to adjust thank you page to make sales automation extra easy, and a special product download ebook that you distribute to your customers after a successful payment without anything further to do! All downloads are run directly from my own website so you never have to worry about super high bandwidth costs eating worm holes into your profit pile. Tags: php
