"Thankfully, there is an Instant Keyword Research Tool that anyone can install and use within mere seconds! In the time it took you to read the above headline, you could have already installed this simple and supremely effective keyword script and begun your search in HIGHLY PROFITABLE NICHE MARKETS!! If you can ftp/upload just one file to your web server (no editing) it may actually take you less than 10 seconds from start to finish! No one loves installing complicated web scripts. Therefore, the thought of spending hours editing and creating MSQL Databases, tweaking complex code and changing file settings would not be a great deal of fun for anyone. Most people dont want to do all the work but still want to find a quick, ultra simple and low cost way of finding hot profitable niches without the hassle. Thankfully, that is exactly what we are offering here . . . Finally, Keyword Research Made Easy Here's why you need to do: 'research' . . . When you're considering buying a new product to sell (resell rights, private label rights or even AdSense templates) you shouldn't make the decision to buy based on how good the seller's sales pitch is. You need to discover the untold details of the product and the only way you will do that is through conducting proper research. Too many people do just that and end up with products that they can't sell. Always remember to never trust a salesperson. Find out the details on your own and never take them on their word. The golden rule of Internet Marketing is to find a hungry market before you create or buy products to sell. If you do not find the proper market, you'll be left with products that nobody wants to buy and you'll waste time and money trying to sell them. Always - Find an interested crowd . . . then give them what they want. So where is this crowd hiding? One highly effective way is keyword research. Conducting proper 'Keyword Research' allows you to spot good potential markets quickly and easily. It's the fast track to identifying all those potential 'profit' pots in the marketplace you can fill. However, until now most of the tools available have been complicated to use, expensive to buy or a nightmare to install. Notice the until now bit because times are about to change. No MySQL needed....Its as easy as pie to install, just upload and customize.. This particular program can run on any server that supports PHP. This program has been tested on Linux and Windows and does not require any database. However, Google API is required for enquiries that are related to Google. And above all,
