The truth is hypnosis can help people deal with: \* Labor and childbirth \* Irritable Bowl Syndrome discomfort \* Post-op surgery bleeding and pain \* Dental treatment recovery \* Migraine headaches \* Chemotherapy nausea/vomiting \* Weak immune systems \* High blood pressure \* Skin diseases \* Asthma \* Negative behaviors like eating disorders, smoking, drug use, bedwetting \* Anxiety disorders, stress \* Atopic and psoriasis dermatitis \* And phobias Unfortunately, the good that hypnosis can do is being lost in all the widespread misinformation that currently exists about this procedure. Heres what you really need to know: The entertainment shows in Vegas and on television that show regular people in a so-called hypnotic trance clucking like a chicken are really just a show. These people are not hypnotized. When you undergo hypnosis: \* You wont lose complete control of your mind and body \* Your therapist wont be able to control you like a puppet \* You wont forget everything that happens under hypnosis \* And you wont be sent into a hypnotic trance against your will In Fact, If Your Life is Not What You Would Like It to Be, Undergoing Hypnosis Could Very Well Be the Solution Youve Been Searching For!
