

Paid Autosurf Pro 2010 (enhanced Version)

[DOWNLOAD HERE](#)

This Paid AutoSurf Pro php script uses a database to store member and advertiser information. This script is used as a stand alone website. A lot of work went into the reconstruction of the discounted paid auto surf to make the Paid AutoSurf Pro and it shows when you take a look at the demo. Registered members can surf and click ads to earn credits and/or cash, advertise their websites and affiliate programs, refer other members for bonuses, and more. The administration area is packed with features and allows the admin (you) to keep track of stats, approve/deny websites, add/edit/delete users, add/edit/delete PTC ads, add/edit/delete banner ads, add/edit/delete text ads, charge for account upgrades, offer sign up bonuses, offer referral bonuses, and so much more. Installation of this script has been made as easy as possible for you. There is a full readme file giving complete instructions to set this script up. An automatic install file has been created to make it even more simple. Almost all website properties are changed from within your admin area. There is so much to this script, that you really need to take a full look around the demo to appreciate the whole thing. Note: This is an exclusive wmscript. If you get this elsewhere, you are not getting the original. Important: It is not recommended to upgrade a Discounted Version to the Enhanced Version. There have been database changes made. If you know what you are doing, you can extract your database information from your old database before you delete it and then inject it into your new database once the new database has been fully installed. wmscripts also offers installation, click on "Installation" in the top navigation. 1. Packed Full Of Features 2. Banner & Text Ad Rotator 3. Featured Links Rotator 4. Paid To Click Area
